

SCIENCE EXPLORATION TRUNK PROGRAM CONSENT AND RELEASE FORM

Noble Research Institute, LLC (“Noble”) offers its Science Exploration Trunk Program (the “Program”) as a free resource to teachers for use in grades 6-12 classrooms. Each trunk contains equipment needed to conduct a hands-on, laboratory investigation. The trunk lessons are aligned to OAS-Science standards and are designed to reinforce science concepts through an agricultural lens and help students see broader connections of science to the world around them.

In furtherance of this effort, the teachers and support staff from the following schools (collectively, the “Schools”) are authorized to participate in the Program:

School Name: _____

School Name: _____

School Name: _____

School Name: _____

As an authorized signatory on behalf of the Schools, I acknowledge and consent to the following terms of the Program:

1. Teachers and support staff at the Schools have been granted permission to request and use the trunks offered by Noble pursuant to the Program.
2. Teachers and support staff must review Noble’s training material and instructions prior to conducting the Program’s trunk experiments.
3. Teachers and support staff must follow all safety procedures recommended by Noble, must enforce all safety procedures, and must closely supervise all students participating in the Program’s trunk experiments. Given the nature of the trunk experiments, I acknowledge that the potential exists for physical accidents to occur. Nevertheless, the Schools assume any and all risk involved.
4. The Schools hereby release Noble, The Samuel Roberts Noble Foundation, their employees, officers, directors, agents, successors and assigns (“Released Parties”) from any and all claims related to any illness or injury sustained by any employee, student, or contractor of the Schools as a result of or associated with the Program’s trunk experiments.
5. The Schools shall indemnify, defend, and hold harmless the Released Parties against any and all liability and/or damages with respect to any claims, suits, demands, judgments or causes of action arising out of the Schools’ employees, students, or contractors participation in the Program’s trunk experiments.
6. The Schools shall compensate Noble for any damage caused to the trunks while the trunks are in the Schools’ possession. Noble, in its sole discretion, shall determine the cost of the damage.

7. Noble may use the names of the Schools to promote its educational programs and overall mission, whether on its website, on social media, in printed materials or through other means of communication and visual media.

I represent and attest that I am authorized to execute this Consent and Release Form on behalf of the Schools.
